

Smoke alarms save lives

**Please, do not
tamper with them**

Under the Ontario Fire Code, you cannot tamper with or modify smoke and carbon monoxide alarms.

These devices are for your safety. Tampering with a smoke or carbon monoxide alarm may cause it not to work, putting you and your family in danger.

Test your smoke and carbon monoxide alarm monthly to ensure that it functions properly. If not, notify your Superintendent or call the Tenant Support Centre at 416-945-0800.
